**1. Is there anything not covered by the proposed indicators? (if yes, please explain)**

No I do not think there is anything that has not been covered but please could there be clear guidance about exactly what “homes considered to be as energy efficient as possible within constraints of cost, technology and consent” means for Band C so that it is not open to interpretation.

**2. Are there any indicators that you feel are not appropriate and, if so, why?**

No I do not think that there are any indicators that are not appropriate but I think associations should be able to provide supporting information if required detailing decision making e.g. cost.

**3. Is there any information we ask for that you feel does not need to be included or that we have been missed?**

No I do not think that anything has been missed. As mentioned above I think the key will be how landlords explain to the Regulator why they have made the decisions that they have made.

**4: Would you like to make any other comments or suggestions about our proposed indicators?**

No nothing further to add.

**Thank you for taking the time to give us your feedback!**
